

Design direction & mobile concept.

The dark editorial system behind the landing page — typography, the five semantic states, layering and spacing, timeline treatment, accessible interaction states, and the page at phone width.

01 · CREATIVE DIRECTION

A reading room for engineering work — *serif thought, mono evidence.*

Two voices, one page

Newsreader carries the human layer — claims, quotes, lessons. IBM Plex Mono carries the machine layer — refs, counts, provenance. The reader always knows which one is speaking.

Deeply layered, never glowing

Four dark surfaces separated by hairlines and faint graph grids — depth from tone, not blur or bloom. Panels sit in the ground like plates on a desk.

Color is semantics only

Blue, green, violet, amber and red appear exclusively as states — evidence, confirmed, AI-drafted, review, rejected — each paired with a shape and a label so hue is never the only carrier.

02 · TYPOGRAPHY

Display · Newsreader 500 · 56–106px · 1.02

Understand the work, *not just the diff.*

Every claim can show its receipt.

Quote / lesson · Newsreader italic

“*Make the state write and the send share one transaction.*”

Body · Plex Sans 400 · 16–19px · 1.65

Turn GitHub issues and pull requests into visual, evidence-backed stories you can understand, explain, and remember.

Kicker · Plex Mono · 12.5px · caps 0.16em

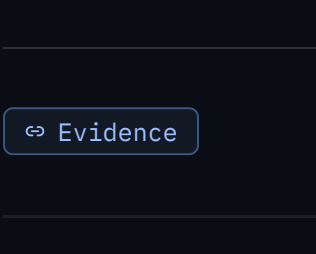

TRUST & PROVENANCE

Ref chip · Plex Mono · 12–12.5px

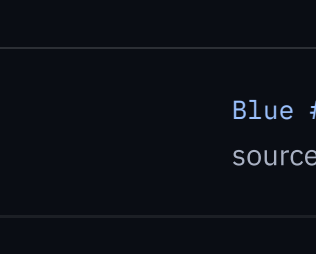

↻ Issue #4821 · comment 7

Nothing on the page sits below 12px. Reading measures hold at 50–68ch; line height 1.65–1.7 for body, 1.02–1.1 for display.

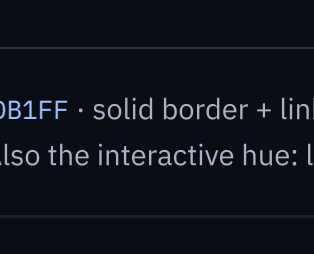

03 · COLOR & THE FIVE SEMANTIC STATES

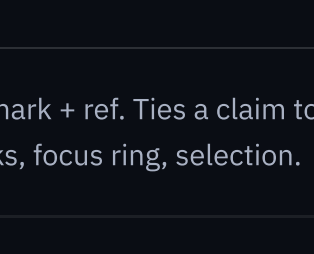

Ground
#0A0D14

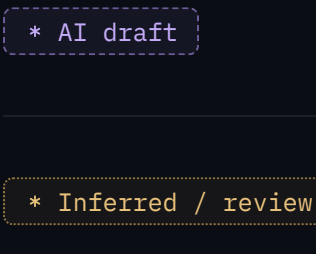

Band
#0D1119

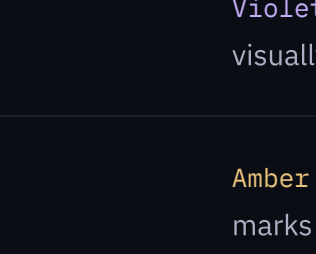

Panel
#10151F

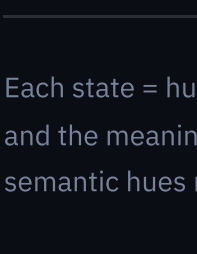

Well (inside panels)
#0C111C

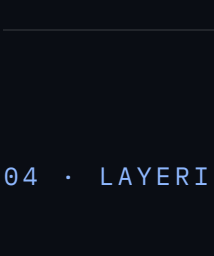

Ink · text & primary
#EDEFFF

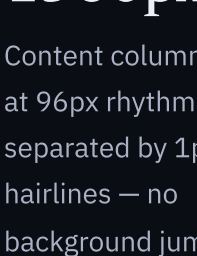

Muted steps
#C9D0E0 · #A9B1C3 · #78829A

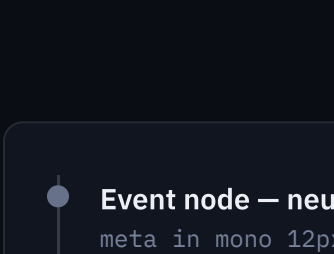

Blue #7DB1FF · solid border + link mark + ref. Ties a claim to its GitHub source. Also the interactive hue: links, focus ring, selection.

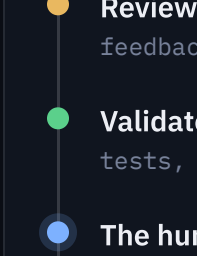

Green #5BD08B · solid border + check. Verified by a person, or by passing validation. The strongest state on the page.

Violet #B294F5 · dashed border + asterisk. Drafted by AI, awaiting review — visually provisional by construction.

Amber #E9B860 · dotted border. Reasoned without a direct source; also marks review feedback on timelines and quote bars.

Red #F26D76 · solid border + cross. Abandoned approaches and destructive actions. Never used for emphasis.

Each state = hue + border style (solid / dashed / dotted) + mark + written label. Strip the color and the meaning survives. Tints stay under 12% opacity; the primary action is ink-on-dark, so semantic hues never compete with the CTA.

04 · LAYERING, SPACING & TIMELINES

1360px

Content column; sections at 96px rhythm, separated by 1px hairlines — no background jumps except the band surfaces.

4 layers

Ground → band → panel → well. Each step ≈3% lighter; borders do the separating, shadows appear once, under the story artifact.

72px grid

Faint graph lines (3% white) sit behind the hero and the close only — the product's coordinate system, not a texture.

6–12px radius

Soft, consistent corners; 150ms ease on hover/focus; under reduced motion, states swap instantly.

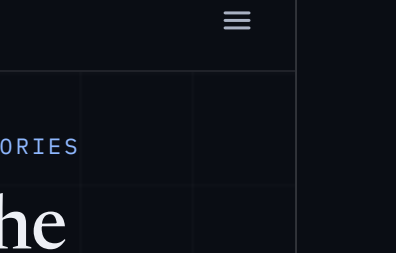

Nodes are 11px circles on 1px rails; the ringed blue node is reserved for the moment that needs a person. Branches carry their verdict as a labeled chip, never a bare arrowhead, and counts sit beside every node so density stays honest.

Maps read left-to-right or top-to-bottom only. Anything a map says, an adjacent structured-text view says in the same order — the map is a rendering of the story, never the only copy of it.

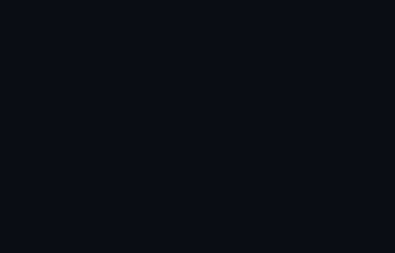

05 · ACCESSIBLE INTERACTION STATES

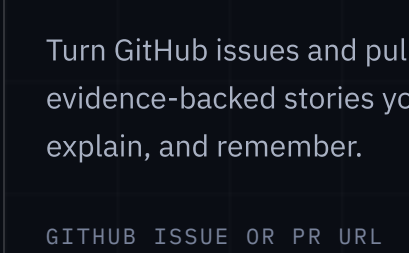

Rest · ink on ground

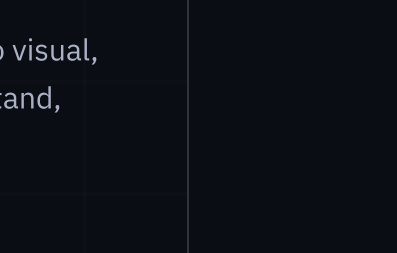

Hover · pure white

Pressed

Keyboard focus · 2px blue, offset 3

Disabled · 40%

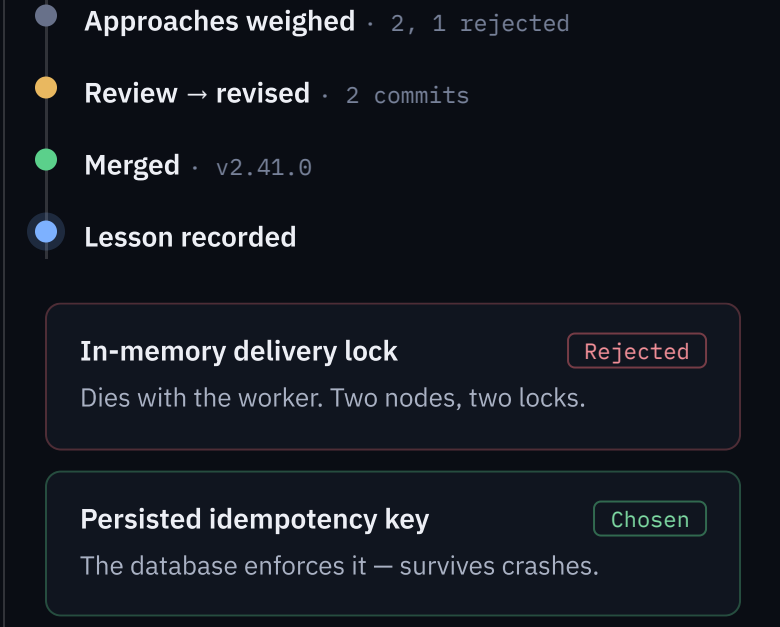

- Targets ≥ 44px on touch; inputs and primary actions at 60px
- Errors are calm and specific: “That URL points to a repository, not an issue or pull request. Paste a link that contains /issues/ or /pull/.”

- Body text ≥ 14.5px at 7:1+; muted meta ≥ 12px at 4.5:1+
- Loading narrates the work: “Reading 11 comments and 4 commits...”

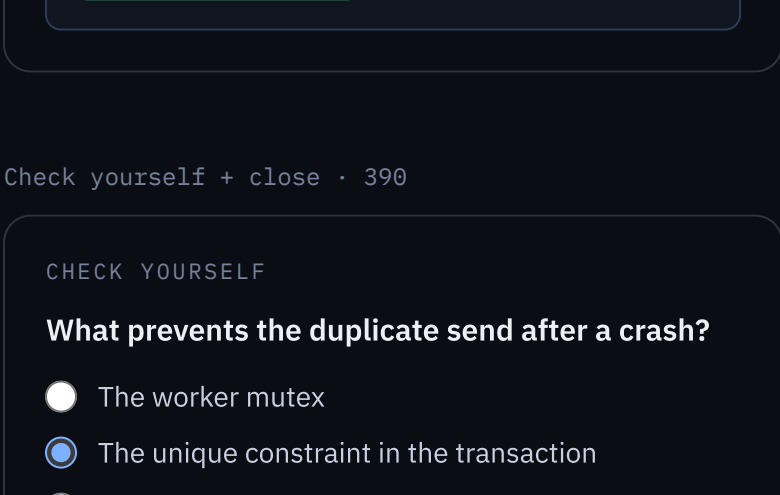

06 · MOBILE CONCEPT · 390PX

One column, same two voices. The timeline stays vertical, chips wrap, actions run full width, and the serif display keeps real scale.

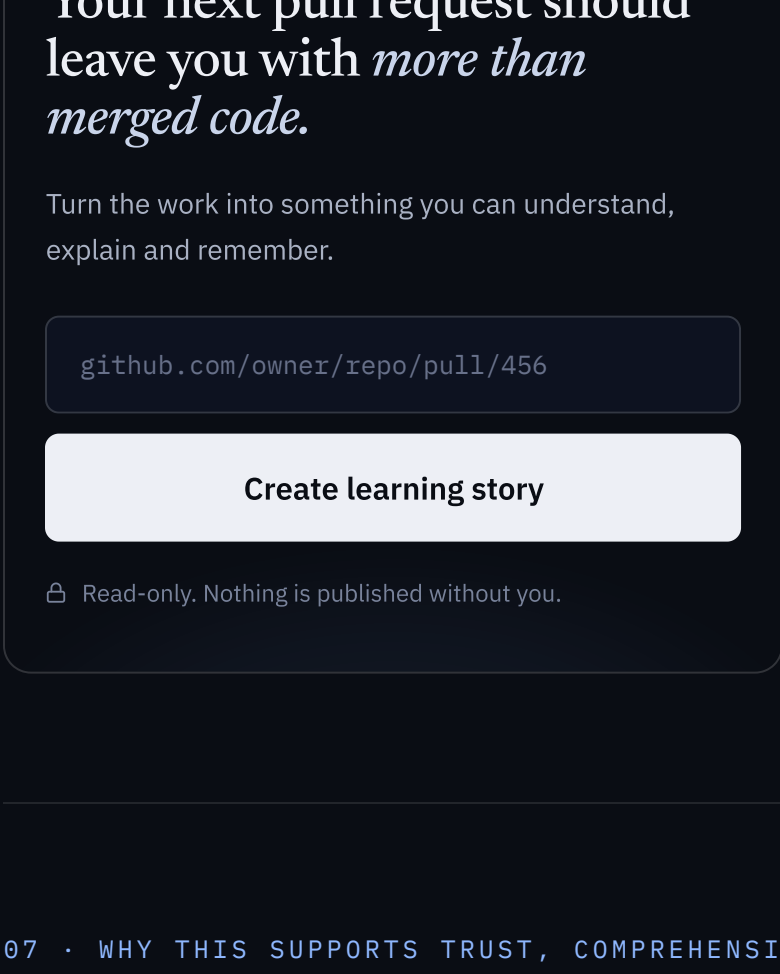

Hero · 390

Learning story · 390

Check yourself + close · 390

07 · WHY THIS SUPPORTS TRUST, COMPREHENSION AND LEARNING
